Facilities Master Plan

Existing Site Plan Diagram
Indicates existing building placement, hardscape and landscaped areas. In addition, the existing site diagram locates relevant program spaces, adjacencies, and current uses.

Proposed Master Plan Diagram
Includes conceptual building placement and hardscape and landscape reconfiguration, if needed. These diagrams note proposed new construction, reconfiguration of existing spaces, the modernization of existing spaces, and indicates spaces where no work is proposed, where eligible, to the standards outlined in the Facilities Master Plan.

Four degrees of work are identified throughout the proposals:

Indicates a space where no work is proposed, due to age and condition of the facility.

Indicates a space to be modernized or repaired as indicated in the facility assessments

Indicates an area of reconfigured space(s)

Indicates new construction

Master Plan Cost Summary
Includes a description of the overall costs of proposed facilities improvements as a reflection of immediate needs and long-term visioning.

It should be noted that estimates are in 2019 dollars inclusive of both hard construction costs and project soft costs. Once an implementation schedule for a project has been determined, appropriate escalation to the proposed mid-point of construction should be budgeted.
